SAEZ ALLAN

Dear Sir or Madam,

French Student currently in 2nd year of engineering school in computer science and electronics, I am writing to you to apply for a computer science or electronics internship. Dynamic, rigorous, independent, I think I have the required profile for this position.

I have work experience in software development. In fact I have been working for 1 year at Index Education, I work with a team of engineers with the aim of developing software for education. We do object-oriented programming in Pascal under Delphi. I use software for GIT like SourceTree or SmartGit every day. I was also able to study computer science and electronics at my engineering school. In particular, I have done programming of embedded systems like the STM32 or even computer projects in C, C++ or SQL language. I passed the TOEIC exam with a score of 850.
I would appreciate the opportunity to put into practice the skills and experience I have acquired during my studies and my atlernance as an apprentice engineer. I am sure I can put my skills to work for your teams.

My goal is to find a 3-month summer internship abroad in order to validate my engineering diploma. More precisely, I am availale from May 1st until August 23rd. This internship will allow me to discover a new profession and it will be an honor to share this experience in your company. You can contact me if you want, and I am at your disposal to answer your questions or for an interview. You will find my CV enclosed for more information about my professional career.
